Full-Stack Software Developer

Skills

- Python | JavaScript | TypeScript | HTML5 | CSS3
- Node | React | NextJs | Flask | Django | Express | SQL | NoSQL | Socket.IO | Prisma
- VScode | Git | Puppeteer | Docker | Selenium | PostgreSQL

Projects

Football League Simulator

league-simulator-smoky.vercel.app

View league standing outcomes as you simulate match results.

- A web application for football fans to follow live match simulations, demonstrating real-time data handling and user engagement techniques.
- API integration with [API-Football](#)
- Data manipulation, and dynamic web content rendering
- Immersive user experience in league simulation

Ymaa Company Website

ymaadesentupidora.com.br

Fully functional website for a local business

- Improved online presence and customer retention by modernizing the frontend, moving from wordpress to React.
- Improved Lighthouse metrics; Seo, performance, accessibility, and Best Practices to reach over 95%

Experience

IT support

TDX-Management

Toronto, ON, Canada

05/2023 - Current

Led the transition from Excel to a web-based app, utilizing React.js, Next.js server-side rendering. Used Prisma ORM to interact with the PostgreSQL database. Provide support for the team of ~15 users.

Tech Stack:

- NextJs, for efficient high-performance rendering.
- Integrated Tailwind CSS for utility-first, highly customizable styling.
- Incorporated the shadcn/UI Library, enhancing user experience and app aesthetics.
- Integrated nextAuth for User Authentication/Authorization, security and user management.
- Employed PostgreSQL for the database to provide solid data integrity and a powerful querying language.
- Utilized Prisma ORM for seamless interaction with the database, simplifying data management and handling.
- Deployed the application on Vercel to ensure a fast, secure, and scalable deployment process.

Professional Development

Continuous Learning

- Actively engaging in self-paced learning to master new technologies and programming languages, with a recent focus on AI and machine learning.
- Active member of local and online coding communities, contributing to open-source projects and participating in discussions about best practices and emerging technologies.
